

## Russian deployed field hospital flew to Guinea

### **RUSSIAN DEPLOYED FIELD HOSPITAL FLEW TO GUINEA**

Russian AN-124 by order of President Putin flew to Guinea, where the epidemic of Ebola continues.

The plane is delivered to Guinea 150 tons of humanitarian aid, medical supplies and equipment for a deployed field hospital.

Mobile deployed field hospital consists of receiving and diagnostic department, intensive care department, three infectious and several laboratories. It can accommodate 200 people.

In addition, in case of emergency, the Russian leader ordered to send planes with special capsules for Ebola infected patient.

WestMedGroup offers its customers several options for rapidly deployable field hospitals: tent or rigid containers. WestMedGroup also engaged in the supply of means of biological and chemical protection – isolation chambers Biobox for infectious diseases and sealed stretcher Biobag.
